

Move Calls

Description:

This article will show you how to do the following:

- **How to transfer an active call to another device assigned to the same user**

Methods:

To move an active call from one of your assigned devices to another without alerting the other party/parties on the call.

1. While the call is active on one device, **dial 6683**, this will transfer the active call to that device without placing the call on hold first.
